Compsn. (I) is compounded of a sodium alkylsulphate (II) and an N-acyl-glutamate (III) as foaming agents. NaCl is present in an amount of 5-30 weight%. (II) is mixed in an amount of 0.1-3 weight%. (III) is mixed in an of 0.1-3 weight%.

(II) is e.g. sodium laurylsulphate or sodium myristylsulphate. (III) is e.g. an alkali metal (e.g. sodium or potassium), ammonium, monoethanolamine, diethanolamine, triethanolamine or arginine salt of N-lauroylglutamic acid, N-myristoylglutamic acid or N-palmitoylglutamic acid.

ADVANTAGE - (I) has excellent foaming property and the feel, and shows no modification under long term storage. (I) is useful for the prevention or treatment of periodontosis such as pyorrhea alveolaris.
